THE FUTURE OF NFT GAMING

Vision of TezNutz

Our vision is to provide our stakeholders and the owners of TezNutzs with a fun experience when managing their digital assets. We strongly believe in the future of crypto gaming based on NFTs. Being able to have fun and making money at the same time is already a fact. Play-to-earn is the approach we want to choose for the NFT based game because we want to reward our stakeholders and believe anyone should be able to hold our NFT's to a certain degree.

GAMEPLAY TEZNUTZS

TezNutzs is a collectible game in the first place, which later gets enriched by a play-to-earn experience you can share with your friends online. Training your army of TezNutz, fighting against the TezNutz of other players, earning achievements and armory will be the core features after we reach the tipping point of the collectible sales.

The Gameplay of v1.0 is envisioned to have:

A place where you can get an overview of all your TezNutz and their current state

TEZNUTZ IN A NUTSHELL

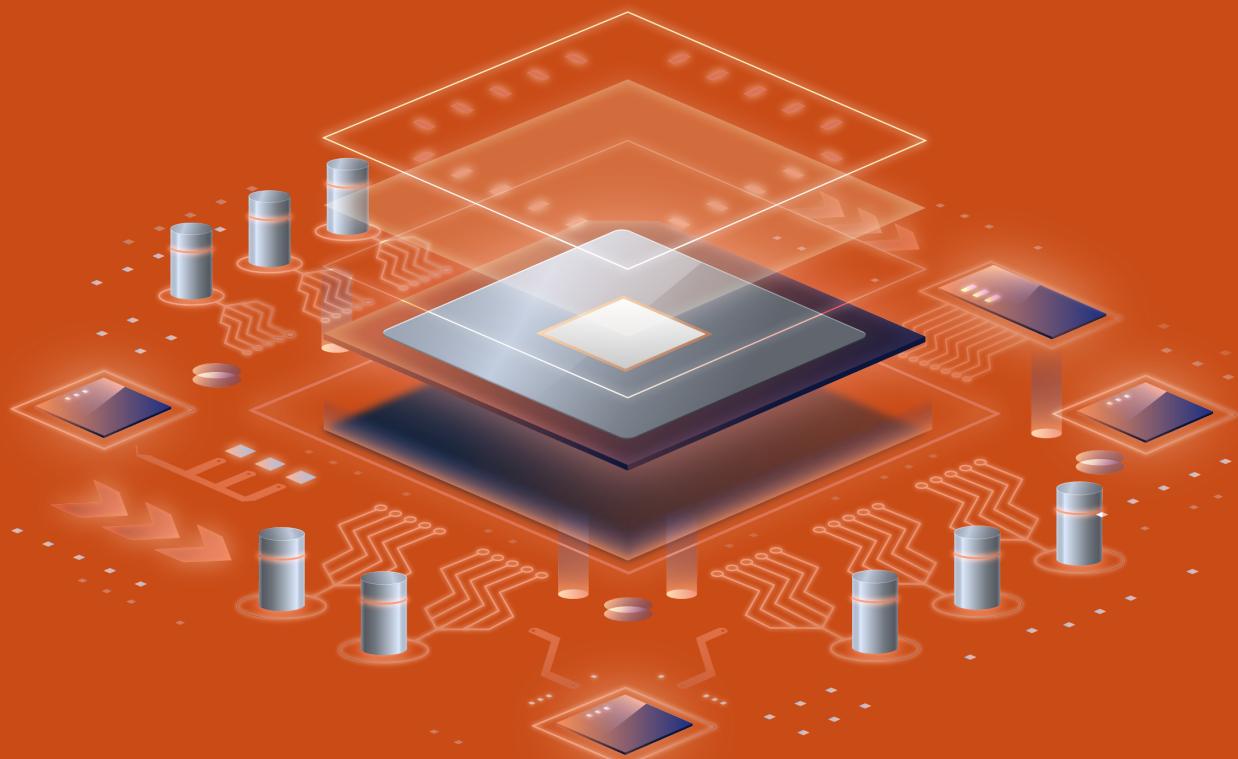

TezNutz uses a Play-to-Earn model by issuing NFTs and a native token through gameplay and giving value to players through NFTs of different rarity levels. By playing the players NFTs will earn experience. Our experience system allows players to rise through the ranks of TezNutz. NFTs may be freely traded on the marketplace, which then can be traded on exchanges or converted to fiat currency. By playing the game your NFTs gain XP. Accumulating XP will help the player to rise and his TezNutz to reach new levels and become even stronger. Once you have bought an NFT, you have the option to start going to war against other TezNutz with it.

DeFi capabilities will be added to the in-game assets. (e.g staking)

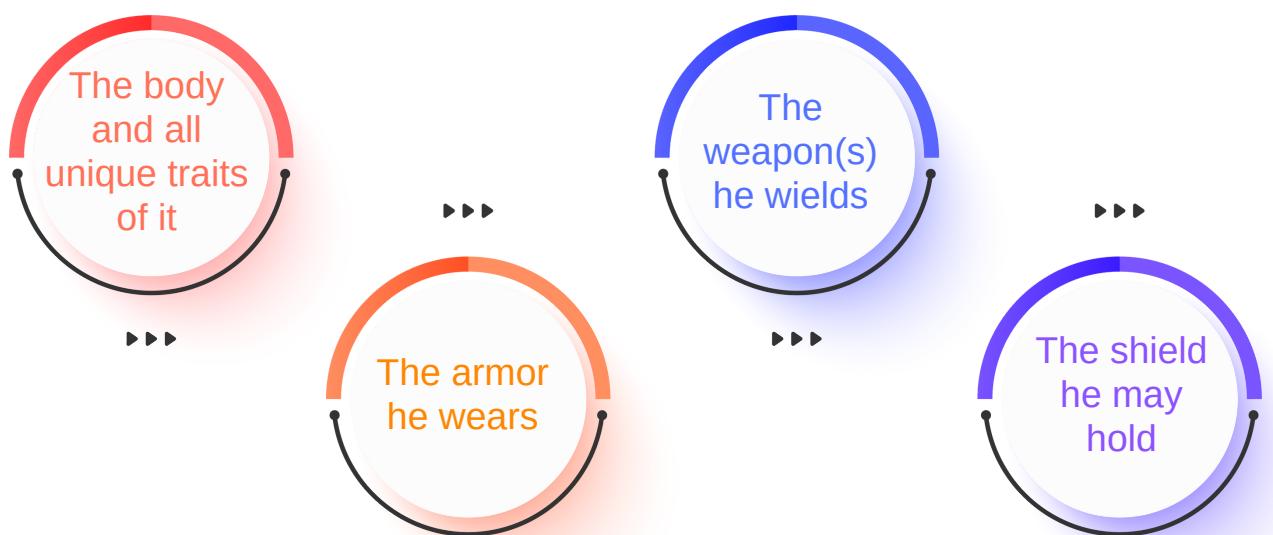

TECHNOLOGY

TezNutz contracts are deployed on the Tezos Blockchain. The player will need to have a nominal amount of XTZ cryptocurrency to pay for transactional gas fees. They will need to have a wallet (i.e. Temple Wallet) that can store the XTZ cryptocurrency and which can also store the native token of TezNutz. By hooking your wallet in-game the player will have a seamless experience of buying and selling this native token. The player will need to set up their wallet to the Tezos network for it. The player does not need any token to start playing the game - no paywalls are blocking you from starting your ingame journey. Furthermore, there is an option to never even purchase a single token and still play the game. Our play-to-earn system allows the player to collect NFTs without having to use any of their own funds. The only restriction is to own a TezNutz. Playing more will allow players to be eligible to purchase higher value NFTs in the future. Once a player decides to actually purchase some of the native token, the player might be able to make progress quicker.

TEZNUTZS NFTS

A TezNutz NFT is defined by three to four characteristics:

Each of these characteristics define your very own TezNutz NFT and make it truly unique.

When the game releases, each characteristic will be granted stats according to the rarity level of the NFT. The following list will give you an overview of these stats:

Body	Armor	Weapon	Shield
<ul style="list-style-type: none">• Health• Stamina• Level• Experience 	<ul style="list-style-type: none">• Durability• Random values of armor, health and/or stamina 	<ul style="list-style-type: none">• Durability• Damage 	<ul style="list-style-type: none">• Armor• Durability 

THE NATIVE TOKEN

The native TezNutz token is the Deflationary Governance token and in-game currency of the TezNutzs ecosystem.

In the final stage of the project, the token will serve the following purposes:

TOKENOMICS

Deflationary Tax (Numbers subject to change with DAO Vote)

5% Tax on AMM Transactions

2.5% Buyer Tax and 2.5% Seller Tax (5% total) on NFT Marketplace Purchases

Token pricing will be announced at stage 2 of the project.

ROADMAP

STAGE 1

- Initial sale of the gen zero NFTs collectibles

STAGE 2

STAGE 2

- Release of the native token and possibility to stake and earn special NFTs

- Release of the base browser game

STAGE 5

- Grow the universe of Teznutz

STAGE 4

- Enable play-to-earn mechanics
